WORK EXPERIENCE

Project Manager Intern

Tann Mann Foundations (NGO), Bengaluru

10/2022 - 11/2022

Project: WhirlyKop

WhirlyKop aims at assisting teachers and children by building a technology assisted educational platform using computer vision, automation corrected services, language processing technology and considering virtual classrooms.

- Spearheaded the development of a new educational platform, leveraging my strong Computer background.
- Utilized project management tools to monitor project progress.
- Coordinated and facilitated 21 number of meetings with stakeholders to gather requirements and align project goals.

Software Developer Intern – Backend

Noetic LogistieX Pvt. Ltd., Bengaluru

10/2021 – 03/2022

Project: LogistieX | Node.js, Express.js, RESTful APIs, JavaScript, MongoDB, React.js

LogistieX is an End-To-End Logistics SaaS Platform. It aims at providing services such as Hub System, Last Mile, First Mile, Hyperlocal Deliveries, Smart Allocation, Reverse QC and Control Tower.

- Developed core web applications utilizing React.js, ensuring seamless user experiences.
- Collaborated on the implementation of REST APIs for efficient data exchange between front-end and back-end systems.
- Implemented server-side logic, prioritizing debugging for enhanced functionality.
- Conducted UI testing to optimize performance and ensure cross-browser compatibility.
- Contributed to code optimization efforts, resulting in improved page load times and overall system efficiency.

PROJECTS

Forkify | API, HTML, CSS, JavaScript

GitHub: [Forkify - A Recipe app](#)

- Implemented search functionality that enables users to find recipes based on their specific requirements.
- Developed bookmarking feature that allows users to save and access their recipes.
- Designed a user-friendly interface that empowers users to create and store their own personalized recipes within the app.

Pandapop | ReactJS, JavaScript, CSS, HTML, API

GitHub: [Pandapop](#)

- Provided users with the ability to search and download a wide range of songs.
- Developed responsive web applications using frontend technologies such as Tailwind CSS and converted Figma designs into interactive prototypes.

Mapty | JavaScript, CSS, HTML, Geolocation API, Leaflet

GitHub: [Mapty - Geolocation app](#)

- Designed geolocation-based app to assist users in recording and tracking their running and cycling workouts.
- Provided users a comprehensive overview of all their workouts, enabling them to monitor and analyze their progress over time.
